F.A.Q.

1. Since weather change cards can't be played the turn they're drawn, (as stated in the rules), that means in the solitaire format you would treat them as no effect? Whatever you roll as weather stays that for the entire turn. Same thing when you use rule 16.1 Random Card Draw in the two player game?

No, in this case the card effect takes place immediately.

2. There are two US divisions slated for the two Omaha beach hexes at the beginning of the game. Do you have to assign one to each beach or can you stack the two US divisions against one beach invasion hex?

No, one is assigned to each beach invasion hex.

3. When there is only a small portion of terrain present in a particular hex, like the swamp in hex 2122, does that terrain count?

Yes, it does.
