

# WACHT AM RHEIN, 2004 ED

## ERRATA 2011

### BASIC RULEBOOK ERRATA

#### 2.3.1 Unit Type

Ignore the underline on all towed AT units. These units cannot use their AT values offensively anyway, so there is no need to reduce the value when the AT unit attacks—since it has no effect on combat.

**2.8.0** When rounding off any game values, always round down, but never below one.

**4.2.6k** note that this is actually Quick Construction

**4.2.6.4** Resting Phase: change—a Leg unit adjacent to an enemy unit may recover from a Resting/Fatigue condition if it is in Combat Covering Terrain and did not move in the previous movement phase.

**4.2.6.6** The defender (Inactive player) always barrages first now.

**4.2.7** Player roles are now completely reversed—including artillery fire (see 4.2.6.6 above).

**4.4.0 Proficiency Check:** a unit now fails if the 1d10 DR is equal to, or greater than the unit's PR rating being checked against. The 1d10 DRs are now read as 0-9. The "0" is a zero value result.

**5.0 Movement Order** of movement example: Unit A uses Tactical movement to move two hexes, not 3. It expends MPs to do so.

#### 5.3 Movement Restrictions

Stacking rules are not in effect while a unit is being moved—with the exception of mechanized units using any form of Road Movement.

#### 5.3.1 Movement Restrictions

substitute "two enemy steps" for the phrase "two enemy strengthpoint".

#### 5.7.2 Truck Points

One Truck Point will motorize any three units—regardless of unit size. Note that this is not the same as using intrinsic divisional motor assets to motorise any three Leg units in an Allied Division.

**5.7.4** Static means the unit did not move in the immediately previous movement phase.

**5.8.2** This rule now applies to all towed artillery units of 105/150/155 caliber—German and Allied.

### 8.0 OBSERVATION

Wherever the terms "populated" or "urban" appear, they represent the same thing—any Location, Village, Town or City feature is collectively called a populated or urban feature. For strict game purposes, they should henceforth be known only as "population" features—or populated hexes.

**8.2.1** A location feature in a hex does not increase the LOS range of a unit sighting from that hex.

#### 10.1.2 Step Loss Marker and combat strength

A step loss marker now reduces a unit's current combat strength by halving (round up) the combat values showing on the unit's reduced side.

#### 10.4.2 RIBs

The limit on the number of RIBs a side may apply toward a GA has been adjusted. The attacker may not have up to six RIB bonuses per GA—no more than three per subformation. The defender may have no more than three RIBs per GA.

**10.5.2** Towed AT units can never be used offensively to gain Armor Bonuses. They can be used to offset defensive Armor bonuses, however.

**11.3.3** Change. DRMs now cannot exceed plus or minus 60. The two terms "Bonus Points" and "Bonus Percentages" mean the same thing and refer to the amount a GA die-roll is modified by.

**11.3.7** The Ground Assault Table, under Attackers Results, third column, second row, should read "01-06" instead of "02-06."

#### 11.4.2 (Combat Result Procedure)

Step A should be: "Each side in the combat must make any Proficiency Checks called for by the Combat Results".

**11.4.4** Maximum Retreat distance for mech units is four hexes. Two if the units were attacking.

**11.6.1** Maximum step loss per unit due to a single barrage or GA is now one step. Note that the inability to retreat may negate this rule and require a unit to lose more than one step.

**11.7.4** Maximum Retreat distance For Mech units, it's four hexes. For Leg units, it's two hexes.

**11.8.5** The Maximum Advance for recon units if advancing solely along roads is now 5, not 4 hexes.

**12.1.6** A single observer can only observe ("spot") for up to two separate barrages per barrage segment, a company may only spot for one barrage.

#### 12.1.6f Air Observation.

The range is now within six hexes of a Allied ground unit.

#### 12.6.1 Ammo Depletion Die-Roll (Change)

For each Barrage, there is now only one Ammo Depletion Die-Roll. However, if a Barrage is composed of multiple Volleys, each Volley after the first modifies the Ammo Depletion DR by a plus one.

#### 14.3.4 Supply Path

The Supply Path of a unit may never be traced into more than two hexes adjacent to enemy units.

**16.1.0** Units in Man Res and combat reserve still benefit from being in Fieldworks (ETs and IPs) and Fortifications.

**16.4.1** Proficiency Increases due to ETs and Fortifications Fortifications and ETs only increase a unit's defending PR by one (not two)—to a maximum of eight.

#### 18.2.4 Thaw

The term "thaw" is now synonymous with "mud" wherever it appears in the rules. All units still reduce their MA's by three MPs unless they move entirely along Primary Roads.

### 19.4.0 Ground Interdiction

The distance a unit must be moved before it is vulnerable to Ground Interdiction is now six consecutive hexes, not four.

### 21.2.3 German Armor Replacements

Concerning the German Armor Repl rule, go by the rules in the scenario booklet. You use a die-roll to determine what type of armor repl you actually get, MkIV or MkV. The more strict players can track the type of armor losses they have incurred and replace steps on that basis, but you are better off using the rules from the scenario booklet. Ignore the rule printed on the Special Repl Chart

**22.1.0 Leader Activation:** a leader is not activated unless the activation die-roll is LESS than the leader's Initiative Rating. A leader may move using Leg and/or Mech movement at any time during its move.

### 23.0 RANDOM EVENTS

Delete these.

#### CHART & TABLE ERRATA

1. The Ground Assault Table, under Attackers Results, third column, second row, should read "01-06" instead of "02-06."

2. The Barrage Results Table, under the 8 point Barrage Value Column, the third die roll range from the top should read "4-5", not "3-5".

3. The Ground Assault and TEC Chart, Leg units attacking across minor rivers are halved.

4. On the German Transport Table, the columns (die rolls) should read 0—9, left to right, and the rows (truck pts.) should read 1—10.

5. Some of the entries of the reinforcement lists on the Turn Record Track sheets are incorrect. Use the Master Reinforcement List on the Player Aid cards.

6. On the Information Markers Summary, the captions for Entrenchments and Improved Positions are reversed.

7. There are two adjustments to the number of APs available to the US Player when using historical weather: the values shown on the US TRT for GTs 20 and 21 should be zero, not four.

8. The number of Inf. replacements given on the Turn Record Track should be doubled.

9. The Master reinforcement list incorrectly

states that Einheit Stielau is release Dec 16 Night; it should read Dec 16 PM.

10. On the Fuel and Reserve Release Table, there is -2 DRM if the (German) Formation's parent Corps HQ is at Extended range. The table notes this is "more than 6"; in fact, it should read "more than 9."

#### MAP ERRATA

1. The bridge at hexside 4925/5026SE is missing.

2. The bridge at hexside 4309/4310SE is blown at the beginning of all Dec 16 scenarios.

3. The trail between hexes 3417 and 3516 on the SE map should be connected.

4. The TEC on the map is incorrect. Use the TEC on the player aid cards.

#### ERRATA COUNTERS

Most of the errata counters replace counters that came with the game. For each errata counter, find all previous counters with the same ID and remove them and use the new counter in their place. Some exceptions to this are noted below. Also note that the breakdown US recon companies were not corrected. They should all have values of 2-2-1, not 2-2-2. Treat as such.

The three bns of the 328Inf Rgt/26<sup>th</sup> US Division replace the three battalions that are identified as belonging to the 181Rgt/ 26<sup>th</sup> Division.

The 17ArmCE bn replaces the 23Arm CE bn in the 2<sup>nd</sup> US Armored Division. All corresponding setups should also be changed to refer to the new unit.

The 307ParaCE replaces the 312ParaCE in the 82ndAB XX.

The 460Para FA bn is added to the 3 Para Infantry bns of the 517 Para Inf Rgt.

The 1<sup>st</sup> and 2<sup>nd</sup> Bns/193 Glider Infantry are added to the 17<sup>th</sup> AB XX. The 466, 680, 681 Para FA bns replace the same units in the 17AB xx.

The 273FA/XII (155G) replaces the 155H unit of the same ID.

The 991AFA, 987AFA, 174AFA 155G-SP bns replace the same three units in the old game.

The 83AFA/VII replaces the 83AFA/III unit.

The 818TD/5<sup>th</sup> Inf XX replaces the 813TD/5<sup>th</sup> Inf XX.

The 440AFA & 434AFA/7A replaces the 443AFA and 480AFA units of the same division.

The 29FA ID (105) was switched around with the 20FA (155) in the US 4<sup>th</sup> XX. The two new counters correct this. Note that the two units should also switch out on all setups.

The 903 and 309FA bns of the 78US Div were also switched around. Replace these two units with the new counters. Remember to also switch them out on all setups.

The 772TD (M10)/83XX replaces the 772AT/83XX.

The 15CE/9Div replaces the 9/9Div unit.

The 112CE bn/VII us a new unit.

The 253/3A FA bn is not used. Ignore it.

The 9<sup>th</sup> SS Recon (Auf) unit was originally missing.

There are two KG vPorsch #2 units for Pz Lehr Div. The JpIV hybrid units should be the #3 unit of that KG.

The reverse sides of both the 10SS, 12SS and 1SS Pz division's JpIV double-company units should have the values 2-2-4.

The 328<sup>th</sup> Inf Rgt of the 26th US Inf Div was mislabeled as the 181st Inf Rgt.

The 51<sup>st</sup> Highland Division's artillery mistakenly has two 128 Artillery Regiments. One of the regiments should instead be 127.

The 11&209/XXX and 210&211/XXX CE bns replace the two generic XXX CE units. The 14&615Arm CE unit of Gds Armour replaces the 4&615Arm CE unit.

The 5SeaH/51 replaces the 500CH/51 unit.

The units of the 78Bgt/53<sup>rd</sup> Division should be the 71Bgt/53 division. These are the 4/RWF, 1/HLI, and 10BLI.

The 94FA (25Ib) replaces the 92FA (25Ib) in the 43<sup>rd</sup> Division.

#### German Errata Counters

Most of the German errata counters replace units of the same ID. The exceptions are noted below.

The 110PzJ(towedAT) of the 11Pz Div is new and added to the division.

The 1123/428 Art of the 6Pz A replaces the 1120/428 Art of 6Pz A. Likewise the 1098+1120+1123 Art of the same army replaces the 1098+1110 Art of 6<sup>th</sup> Pz A.

The 1099+1119+1121 Art of 5PzA replaces the 1099+1119 Art of 5Pz A.

The 1124+1125 Art of 7<sup>th</sup> Army replaces the 1122+1125 Art if the same Army 1122+660/7A is a new unit.

The 21/18VWx and 22/18VWx units replace the 90 and 91 units of the 18VWx.

### **Original German Counter Replacements**

These are the original errata instructions that came with the game. They are still in effect, but there have been some edits.

Some motorized German artillery units have white "wheel" symbols instead of black; the two are treated exactly the same; the white wheels are vestiges of a rule discarded after printing the counters.

The 406/V 150 artillery unit on Allied counter sheet four replaces the 406/V artillery unit on German counter sheet three.

The 406/IV 122 artillery unit on German counter sheet four replaces the 406/V 122 on German counter sheet three.

The 406/III 105 artillery unit (9H) on Allied counter sheet four replaces the same unit on German counter sheet three. The 406th VAK should then consist of the III, IV, V and VI battalions (four units).

The 766/II, 766/V, and 408/II artillery units on Allied counter sheet four replace the same units on German counter sheet three. Don't use any of the German VAK units on German counter sheet three (top row - 766/II, 766/V, 408/II, 406/V), as they have all been replaced as noted here.

Discard the LXVII Korps HQ on German sheet three. The LXVI Korps HQ replaces this and is found on Allied sheet four.

Discard the German infantry and armor replacement markers on German sheet three and instead use the corrected markers on Allied sheet four—the backs were incorrect.

Discard the two 3-18-2-0 heavy artillery units (5<sup>th</sup> PzA & 6<sup>th</sup> PzA) they are not used.

Discard the two 2-6-7 heavy FLAK companies (with 5 FJ and 3 FJ divs) on German sheet two and replace them with the correct (2-3-7) counters found on Allied sheet four.

On Allied sheet four these seven German artillery units all correct the mistaken combination of "wheels" and "H" symbols on the out of battery side for the same units originally found on German sheet two: 388/III, 402/III, 402/IV, 405/III, 401/III,

766/III, and 408/III. Discard the units found on sheet two and use these replacements instead.

405/IV on Allied sheet four replaces the 405/IV on German sheet two. The original unit was mistakenly classed as horsedrawn. 15. The following units on Allied sheet four replace incorrect

German units on German sheets one through three: Fus Co 287, 12 StG/12VG Div, and FührerGren Artillery/Führer Gren X. Discard the incorrect units on sheets one through three and use the correct counters instead.

### **Original Allied Counter Replacements**

All American Armored Recon battalions have an armor value of one (1).

There are two Allied Air Supply markers labeled "N" on German sheet three. Discard one and replace it with the Allied Air Supply Marker labeled "S" on Allied sheet four.

The following units on Allied sheet four replace any of the same units found on Allied sheets one through three. Discard the identical counters on sheets one through three.

- a. 893TD/78, 813TD, 643TD/3Axx, 773TD/VII, 629TD/VII, 607TD/87xx, 704TD/4Axx
- b. 712TK, 746Tk IIs
- c. 1/502/101Abxx, 1/505/82Abxx Parachute Infantry Bns
- d. 241FA/XII, 776FA/III, 980FA/XVIII, 809FA/XVIII.

The backs of the breakdown British Parachute Companies are mistakenly printed with assault factors of "3-4"; they should be "1-2" instead.

The 16<sup>th</sup> and 18<sup>th</sup> Regiments' battalions of 1<sup>st</sup> US Inf Div on US counter sheet one should all be replaced with the same battalions found on German counter sheet three. The same applies to the 2/394, 3/394 Battalions of the 99<sup>th</sup> US Inf Div and the 1/110 Infantry

battalion of the 28th US Inf Div.

The three following artillery units should be discarded:

18FA/VII, 924FA/V, and the 268FA/V (G version). Those units are not used in the game.

The following artillery units are replaced with the correct counters on Allied sheet four: 776FA/3A, 809FA/VXIII, and 980FA/VII. The correct units are 776FA/III, 809FA/XVIII and the 980FA/XVIII, respectively.

For the AT units of the 82<sup>nd</sup> and 101<sup>st</sup> AB divisions, use three breakdown AT companies for each division.

## **SCENARIO BOOKLET ERRATA**

### **16.8.4a US Air Resupply**

From Dec 18AM to Dec 20PM, the US player only has one Air Resupply Point available for each AM and PM GT. Starting with the Dec 21AM GT, the number of such points is increased to four.

For all Dec 16 scenarios, Pz Lehr is allowed to use the hvy bridge in 5th FJ xx's sector and move within five hexes of it without suffering the penalties for moving out of its army sector (5th Pz Army).

**19.1.0** On the Jan 1AM GT, if the Germans launch Operation Bodenplatte, they have zero APs available for every GT after the mission. The US player permanently loses 6 APs each GT if the German player rolls 0-3 on a 1d10, 3 APs if the dr is 4-6, and 1 AP if it is 7-9.

German units are not prohibited from occupying a US entry hex. If it is occupied, the US player may bring US rein one turn later within three hexes of the blocked entry hex—they may arrive in any mode. If every hex along a reinforcement mapedge is enemy occupied, the US player may attack from off-map hexes to get on the map.

### **32.1.0 Dec 16 Scenario Starting Weather and Ground**

The weather for all Dec 16 Scenarios is always initially Overcast/Normal Ground until the beginning of the 17AM GT.

### **32.1.3 US Unit Activation**

Inactive US units may not be moved, construct fieldworks, destroy bridges or voluntarily change Formation (from Tactical mode) until activated. A unit is activated

after it has been ground assaulted (barrages don't count, even if the unit retreats) or enemy units adjacent to it have participated in a GA (against another US unit). If all friendly units adjacent to an American unit have been retreated, that American unit is immediately considered activated—even if that unit is Entrenched.

When activating CCB/9Arm on Dec 16, units of the formation only have to move within one hex of St Vith before being free to move without further restriction. They do not have to end their movement within one hex.

**32.1.4** All German divisional artillery (except those in Maneuver Reserve) must start and stay In Battery until Dec 17AM GT. The 272<sup>nd</sup> Division may not move. Overstacks are ignored if started that way.

**32.2.2** The CCB/9Arm units are not placed on the map. The US side receives 6 AirPts, not 4.

**32.2.5** Germans have 2 Truck Pts, while the US side has 4. These can only be used to motorise friendly units.

Basically, for all Dec 16 scenarios not using the entire map of more than one army, between Dec 16 Nite and Dec 19 Night, the Germans can only use 2 TPs each for the 6<sup>th</sup> and 5<sup>th</sup> Pz Armies to move artillery units and/or motorise other Leg units; only 1 TP can be used for this purpose by 7<sup>th</sup> Army. All other TPs are ignored and cannot be used for any other purposes until the Dec 20 AM GT.

**32.3.6** US has 3 Truck Pts for motorization

**32.3.7** The German player has normal Fuel status for the entire scenario. 5Pz Army has one Ammo Pt stockpiled.

**32.4.5** The German Fuel status is Normal. The US side has 3 Truck Pts.

### **32.6.0**

For Scenario E (Dec 21), the US receives 4 AirPts per GT.

For Scenario F (Dec 21 GP) The US side receives 8 AirPts per GT. These points are affected by weather. Also, the Germans have only two TPs and the US side has six.

For Scenario D+E+F, the US side has 12 TrPts available and the Germans have 8 for 6<sup>th</sup> Pz Army and 6 for 5<sup>th</sup> Pz Army available. Each side also has one-half the number of AirPts available from rule 20.1.2—weather affects these points.

#### **Unit Arrival & Setup Errata**

The Master reinforcement list shows the US 957 FA/VII in two spots: 18AM and 20AM. The correct entry is the 20AM entry.

The 1,2,3/311/78xx don't set up anywhere. They were attached to 8th Inf Div to the north. Future variants will use them.

The 1<sup>st</sup> US Inf Div HQ comes in on Dec 18 night appearing at Herve on the NE map. The 1st Combat Engineer Bn is broken down with one Eng Co appearing with each Rgt of the 1st as it appears on the map (16th, 18th and 26th Rgts).

Patton enters Dec 20 night turn on any SE map edge. There is no 3<sup>rd</sup> Army HQ.

The 635/4 ArmC enters on Dec 22 AM, N edge [H-I] it's part of 4<sup>th</sup> Cav Grp.

The 2&3/118 Bns are part of a future variant. They are not in play anywhere under the current rules.

The 751 AFA/V is in the 78th Div Sector (out of play if you ignore the 78th Div for any scenarios. 5005NE is the hex setup number.

The 1/8/4xx, 3/8/4xx, 1/22/4xx & 44FA/4xx units are not available in the current scenarios.

The 653<sup>rd</sup> PzJ bn was being saved for a variant rule in the upcoming Player's Guide. For now, on the Dec 16PM GT roll a d10. If the result is 0-2, you get the unit during the German movement phase, entering in any of 6<sup>th</sup> Pz Army's entrance hexes on the east map edge.

The 217th Sturmpanzer arrives in either the 5<sup>th</sup> Pz Army's or 6<sup>th</sup> Pz Army's entrance hexes on the east map edge during the Dec 16 Night GT. For later scenarios, the unit is eliminated due to mechanical breakdowns and losses.

The German LIII Corps HQ enters per the rein chart-Dec 21. You may attach anyone you want to it, up to the supply limit.

Any reference to the 181Infantry Rgt/26<sup>th</sup> US Division should be changed to 328Infantry Rgt/26<sup>th</sup> US Division.
