

World War II

EUROPEAN THEATER OF OPERATIONS

Errata (as of January 1992)

Rule Book

[11.6] U-boat Movement. Unlike other naval units, U-boats do not have a movement allowance. All U-boat movement occurs during the friendly Naval and Air phase. A U-boat can move directly from a friendly port to any area containing a convoy escort box. U-boats at sea in the Naval and Air phase move directly from one area with a convoy escort box to another area with a convoy escort box, skipping all areas between them.

A U-boat at sea during the friendly Naval Movement step can move directly to a friendly port, skipping all spaces in between. However, once a U-boat is at sea, it must remain at sea for a minimum of three monthly turns before returning to port.

U-boats can never be intercepted or attacked as they move.

A U-boat that begins the monthly turn at sea can engage in Strategic Warfare and move in the Naval and Air phase of the same monthly turn. A U-boat that begins the monthly turn in port cannot engage in strategic warfare that month, but can move to a sea area with a convoy escort box.

Map

Capetown is a major port. It is not a sea area. Entering Capetown from the South Atlantic or Indian Ocean costs 1 movement point.

Hex w1414 is an all-sea hex; w1314 and w1315 are coastal hexes connected for both land and sea movement.

Map Errata

- Hex W2117 belongs to Spain, not France.
- Footnote 6 on the Axis EP Costs table should state, "1-4 season delay."
